

WHERE CAN I FIND MY FAVORITE GPB EDUCATIONAL PROGRAMS?

Georgia Public Broadcasting will be launching a new digital education channel on October 1, 2008. This new channel, **GPB Knowledge**, will be available throughout the state of Georgia and will replace our existing delivery method of GPB Satellite Programming Education (formerly PeachStar Satellite Programming). Much of the content will be available through GPB Education Streaming and the GPB Digital Library On-Demand, as well as on our new channel, **GPB Knowledge**. Educators will have the same recording rights as before.

To receive GPB Educational programs, educators have the option of:

- * live viewing of **GPB Knowledge** (on television)
- * downloading from GPB Education Streaming to their computers for later viewing
- * storing on portable devices for more convenient viewing (i.e., flash drives or burning to CDs)

Schools will receive **GPB Knowledge** via:

- * cable – Contact your local cable provider for channel location.
- * commercial satellite
- * digital receiver - Tune to 8.3 for our new digital channel, **GPB Knowledge**.

A converter box may be purchased wherever electronics are sold and costs between \$40 and \$80. A converter box will convert analog televisions (these are TVs with "rabbit ear" antennas) to digital so you and your students may enjoy digital broadcasting.

In the event that your area does not have access to broadcast television and you'd like to watch **GPB Knowledge**, the channel may be accessed on your computer by using a USBTV tuner and antenna.

GPB Education Streaming will continue to provide On-Demand delivery of over 5,000 full-length videos with segments and educator resources. Visit www.gpb.org/education for more information and a complete list of all GPB Education programs.

FREQUENTLY ASKED QUESTIONS

1. Do I need a digital converter box if I have cable access?
No, but you will need to contact your cable provider since GPB is currently in the process of seeking cable carriage.
2. How do I know if my cable company carries **GPB Knowledge**?
Contact your cable company directly.
3. How do I get the **GPB Knowledge** channel if my cable company doesn't carry it?
You will need to switch to a digital television with an antenna, or use an analog television with a converter box and antenna or watch on your computer using a USBTV tuner and antenna.
4. How do I get the **GPB Knowledge** channel between now and the time that my cable company begins carrying it?
You may watch now on your school satellite channel 430 but that is slated to end on December 31, 2008. You can also access **GPB Knowledge** on your computer using a USBTV tuner and antenna.
5. How can I tune to digital channel 8.3?
Your remote will scan to find 8.3 when you set up your converter box or you can program it in on your remote.
6. How can I access **GPB Knowledge** from my satellite dish service?
You will have to contact your satellite dish provider. GPB is awaiting carriage.
