1. Which store is the best deal? Explain.

2. If I spent \$5.08 on 4 pounds of apples, how much did I spend on 1 pound? (You do not need to refer to the ads for this question.)

3. If I have a coupon for \$0.75 off of toilet paper, how would that change the price at each store? What if Publix doubles that coupon but Kroger does not? Would that change which store is the cheapest?
