

Two types of
cute
babies!

by Molly
Epstein

GOODOG

Once upon a time in May There was
a mother bird. She had laid her
eggs and her eggs were hatching!!!

Five eggs had hatched plus three not hatched eggs
equals 8. She named chicks Kaya, Tita, Ganga,
Lala and Jaja.

In the same tree there was a moth-
er squint with two babies named
Hannah and Maxi. It was a nice
day with a rainbow in the sky. The
mothers brot food for the babies.

It seemed like nothing could go wrong
in the tree in a lily pad pond.

The mother bird taught her
babies how to swim.

That night Hannah fell out of her
nest...

...and splashed into the pond!!!

She did not know how to swim!

Luckily for Hannah, Yaya was very good at swimming. He heard her squeak and flew down to the rescue.

The next day Yaya and Hannah were at the tree. Hannah thanked Yaya. They became best friends for life.
