## Unit 6D Mole to Mass Calculations

Name:

Date:

Answer each of the following questions using the equation provided. BE SURE TO BALANCE EACH EQUATION BEFORE SOLVING ANY PROBLEMS and SHOW ALL WORK.

In a reaction between the elements aluminum and chlorine, aluminum chloride is produced.						
	-	AI +	cı <sub>2</sub> >	AICI <sub>3</sub>		
a.	2 moles of Al will rea	ct with	_ mole(s) of Cl2 to	produce	mole(s) of AICl <sub>3</sub> .	
b.	How many grams of	AICI <sub>3</sub> will be produce	ed if 2.50 moles of <i>l</i>	Al react?		
C.	How many moles of	Cl <sub>2</sub> must react to prod	uce 12.3 g of AICI <sub>3</sub> ?			
d.	How many grams of	aluminum will react	with 3.4 moles of o	chlorine?		
e.	If 17 grams of alumin	num react. how many	moles of aluminum	n chloride will be proc	luced?	

## Unit 6D Mole to Mass Calculations

Answer each of the following questions using the equation provided. BE SURE TO BALANCE EACH EQUATION BEFORE SOLVING ANY PROBLEMS and SHOW ALL WORK.

2.	The ammonia ( $NH_3$ ) used to make fertilizers for lawns and gardens is made by reacting nitrogen and hydrogaccording to the following reaction				
	$\underline{\hspace{1cm}} N_2 + \underline{\hspace{1cm}} H_2 \Rightarrow \underline{\hspace{1cm}} NH_3$				
	a. Determine the mass in grams of $\mathrm{NH_3}$ formed from 1.34 moles of nitrogen.				
	b. What is the mass in grams of hydrogen required to react with 1.34 moles of nitrogen?				
	c. How many moles of nitrogen are required to produce 11.7 moles of NH <sub>3</sub> ?				
	d. How many moles of nitrogen are required to produce 11.7 grams of NH <sub>3</sub> ?				

e. How many grams of hydrogen are required to form 3.5 moles of NH<sub>3</sub>?
