Pollinator Habitat Project Design Brief

You and your group have been hired to design a pollinator habitat for our school! What types of things should we include in a pollinator habitat?

- What plants should we include?
- What pollinators do we want to attract?
- What will the plants in our garden need to grow?
- How much space do we give our plants?
- How do you want the pollinator habitat to look?

Your goal is to create a pollinator habitat that gives the plants what they need to grow and attract pollinators.

Date: _____

Day One: Plants in my Pollinator Habitat

Choose **three plants** for your pollinator habitat. Remember:

- a. The plants must attract pollinators; and
- b. The plants must be *Georgia* plants.

These are the three plants I will include in my habitat:

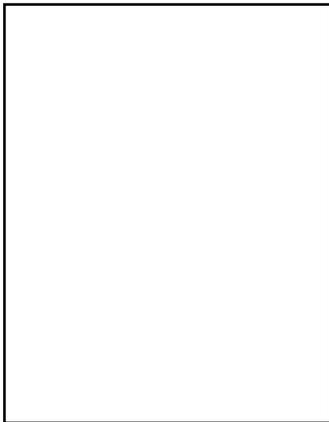

1. _____
2. _____
3. _____

What pollinators will your plants attract?

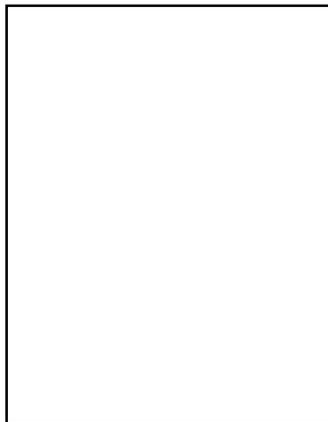

1. _____
2. _____
3. _____

Draw the plants in the boxes below.

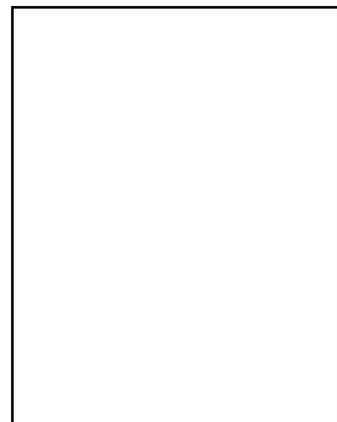

Plant 1

Plant 2

Plant 3

Day Two: Pollinator Habitat Design

What things will your plants need to survive?

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____

Draw a picture of your pollinator habitat. Include the plants and the things they will need to survive. Label your picture.

Designing a Pollinator Habitat Booklet

Describe your group's pollinator habitat:

Why did your group design the habitat in this way?

What do you like about the habitat?

What would you change about the habitat?

Day Four: Our Plants and Pollinators

What types of plants did you select for your habitat?

What pollinators would your habitat attract?

Would your habitat meet the needs of the plants? How do you know?

Why is it important to build the pollinator habitat?

Designing a Pollinator Habitat Booklet

Day Five: Pollinator Habitat Design Presentation

Now, you will present your final products to your classmates, parents, and others from our school!

Presentation requirements:

- Every group member must speak.
- You must have your chart paper with the completed habitat design.
- Each group member must be prepared to answer questions about the pollinator habitat.
- Each group member must turn in their completed habitat booklets at the end of class.
- Be prepared and confident when presenting.
