

Note Taking Guide- Episode 1202 - Part 2

Examples of creating forced vibrations or concentrating sound waves to make a sound louder:

Resonance:

-
-

Describe the two lab activities -

- 1) swinging book on a string (How must you time your puffs to make the book swing higher and higher?)

- 2) twisting rod to make different length pendulums swing. (What did you observe?)

List examples of resonance from the video:
