Black hole
on the
way!

Solar News: Monster
Blackhole on the way!
Oh no! All the planets
and the Sun had to make
an escape plan. So they
held a meeting. Everyone
shared their ideas.

Mercury said, "Let's move to
another galaxy".

"Not possible", Sun said.

The Black Hole

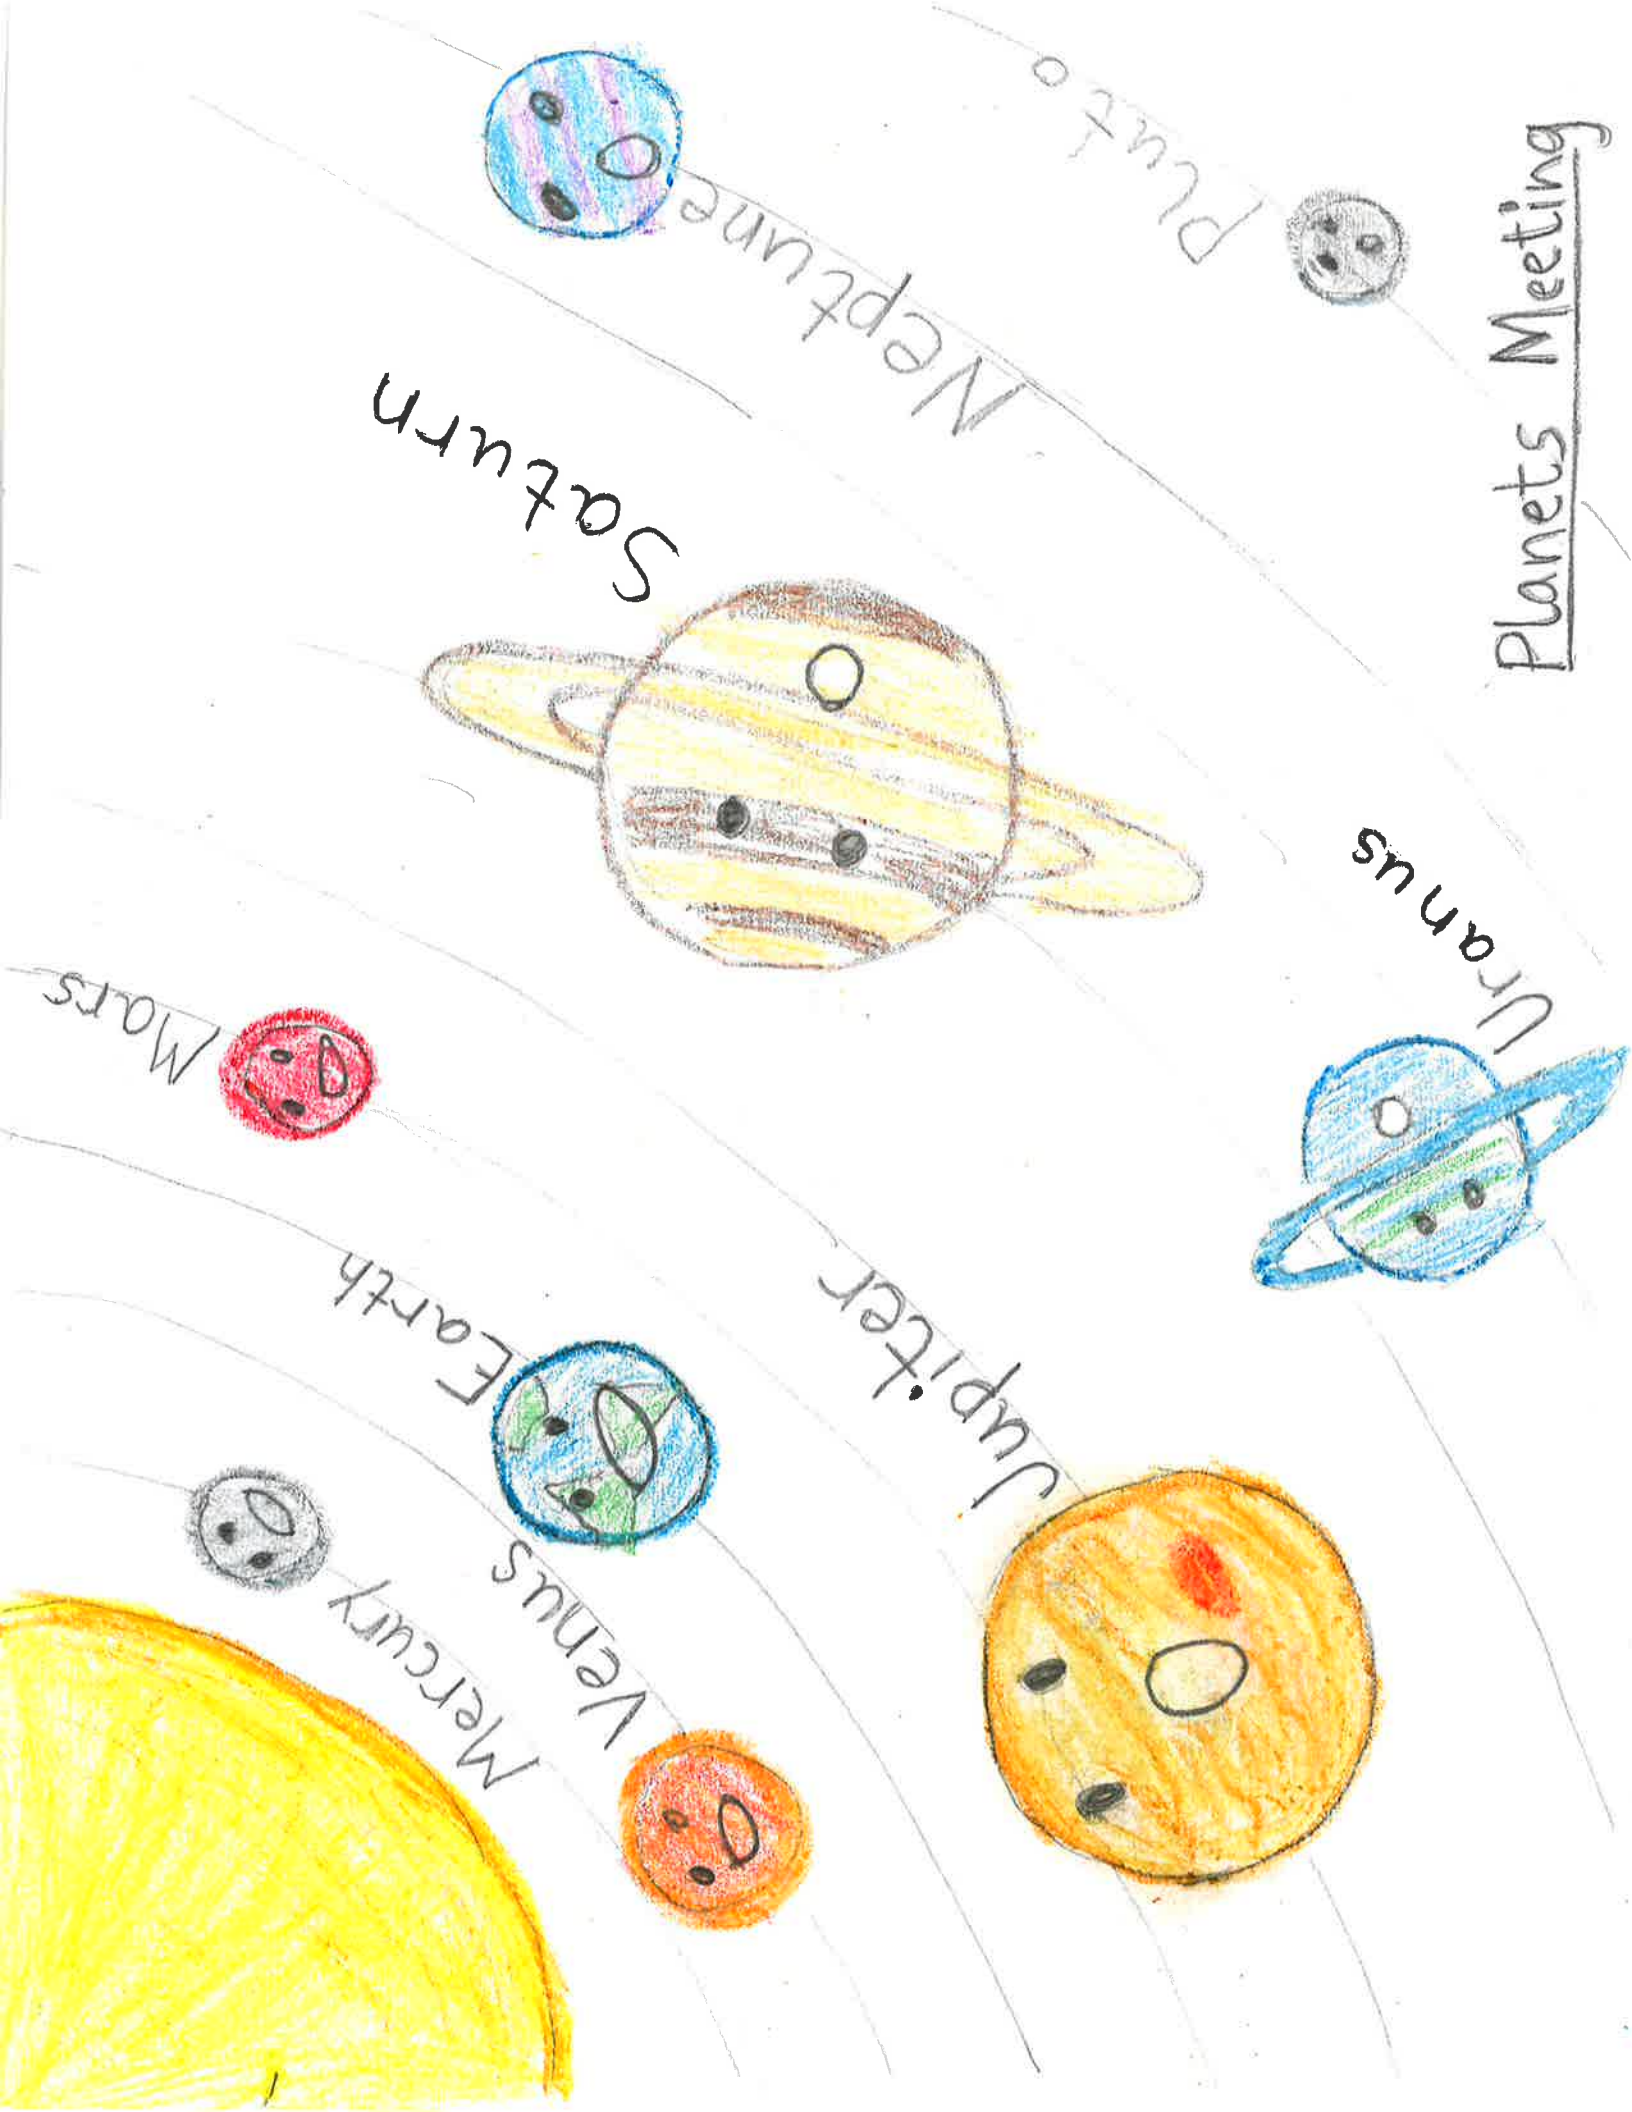

Venus said, "I can shine as bright as possible, and it will run away".

Earth said, "I can splash all my water and shoo away the black hole."

Mars said, "I can throw my dust to shoo it."

Jupiter said, "I can make a big ball of all the asteroids and throw it at the black hole".

Planets Meeting

Saturn

Jupiter

Uranus

Neptune

Pluto

Mars

Earth

Venus

Mercury

"Let's throw some of my rings and the black hole will chase those away!", Saturn grinned.

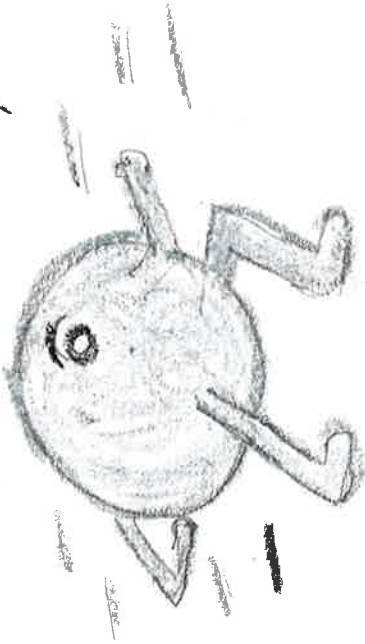

Uranus said, "I can freeze the black hole with my ice".

"I can throw freezing storms and change it's path," Neptune said.

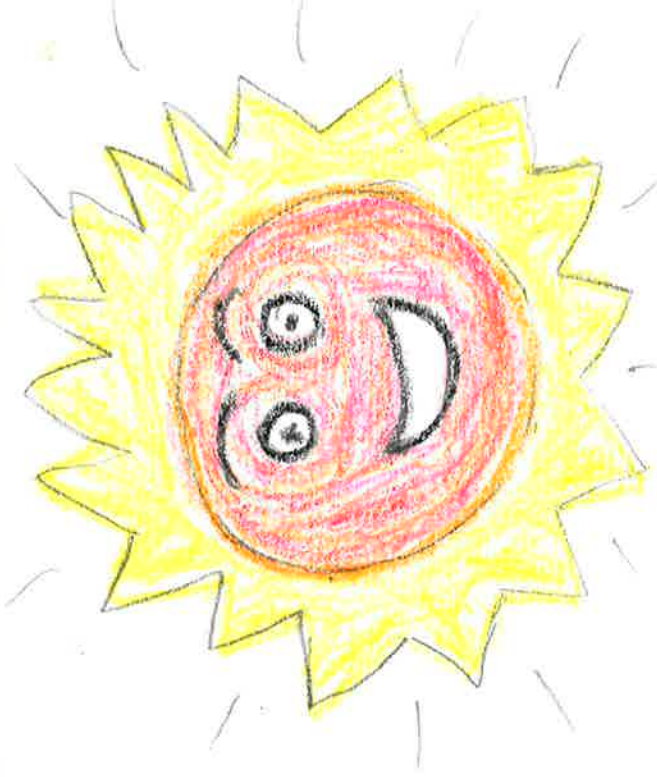

"Master Sun, I know I am the smallest, but I would like to help too", said Pluto.

Sun asked him what his idea was.

Run away

Mercury

Shining Venus

Mars duststorm

Water

Earth

Pluto said, "I can stink up the blackhole with my methane gas and it will run away!"

Everyone was proud of Pluto and cheered for him, "PLUTO PLUTO!!!!"

After hearing all of the ideas Sun said, "Thank you my planets, but I cannot risk your lives, so here is my plan."

Every one was so curious and nervous!

Asteroid Ball

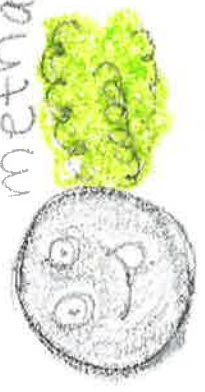

Jupiter

ice cubes

Uranus

methane

Pluto

Saturn throwing rings

Neptune Freezing Storms

Sun said, "I will turn off my light, so the blackhole cannot see anyone. Since it eats only bright things, it cannot eat us if it cannot see us!"

Everyone cheered "HOORAY!"

And Sun said "Quiet! The Blackhole might hear us!"

"But how can you turn off your light?", asked Mars.

SNAP! He was gone.

"Uh oh!", said Earth.

"See!", an invisible Sun said.

But then, they heard a sound far away, "GRRR!!"

The confused blackhole left.

This is how they all escaped the blackhole and lived happily ever after.

THE END
