

# The Magic frisbee

by Aditya varma

One day, me and my  
brother were playing outside.  
Suddenly a magic frisbee came  
out of nowhere and hit me.  
I felt so strange. When I looked  
up, a gigantic thing was about to  
crush me. Then I tried to escape.  
But I could only crawl. Something

zoom

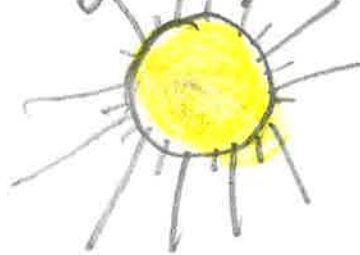

went wrong I turned into a  
worm. I felt someone holding me  
its my brother who also turned  
into a worm. Then we crawld  
into the house and called our  
dad, he didnt hear us.

I am hungry, told my brother  
Then I think of the book my  
mom read to me, "All about  
Earthworms". Earthworms live in  
soil so we crawled to the garden,  
I ate plants and my brother  
ate fungi, yuckooo 😬

yuckoo!

My mom told me worms  
are grate to soil. They help to  
increas the amount of air  
and water in the soil by  
diging. It's fun to dig, told my  
brother. we started diging our  
garden. He bounsd on me in the

hole. Our plants grow bigger and faster. oops!. The magic frisbee hit us again we are back to normal.

Haveing worms in your garden is a real good sign that you have a healthy soil!!!

Thank you earthworms for the amazing job.

# The End
