Learning goals:

1. Develop and employ computational thinking strategies (break-down, find patterns, and create algorithms) to identify and solve problems. (computer science)
2. Make sense of problems and persevere in solving them. (mathematics)
3. Distinguish between information provided by pictures and information provided by words. (English language arts)

Objetivos de aprendizaje:

1. Desarrollar y aplicar estrategias de razonamiento computacional (descomponer, identificar patrones y crear algoritmos) para identificar y resolver problemas. (computación)
2. Comprender problemas y perseverar en su resolución. (matemáticas)
3. Distinguir entre información visual e información léxica. (lenguaje)
